

Many pro-life people worked hard to elect President Trump. That hard work has paid off for the pro-life movement and the unborn! Here are just some of the pro-life accomplishments of the President and his Administration so far:

1. First of all, **President Trump** did the pro-life movement his greatest service by keeping Hillary Clinton out of the White House. Had she been elected, the extremism of abortion in America would have reached a fever pitch unlike anything we've seen before.
2. **President Trump** fulfilled his campaign pledge to only appoint pro-life Justices to the Supreme Court when he appointed **Justice Neil Gorsuch** and **Justice Brett Kavanaugh**. Also, he has placed another 198 conservative judges on the Circuit and District courts, bringing significant change even to the liberal 9th Circuit.
3. **President Trump** has deprived the abortion industry of billions of dollars. He signed legislation to permit the states to defund Planned Parenthood of Title X family planning. He also issued an Executive Order to give states the option to withhold Medicaid and other federal money from organizations that perform abortions, including **Planned Parenthood**.
4. **President Trump** implemented the Protect Life Rule, a rule by the Department of Health and Human Services to cut taxpayer funding under the Title X program for any facility that performs abortions or refers clients to them, such as Planned Parenthood.
5. **President Trump** re-instated and expanded the "Mexico City Policy." His new policy ensures that our tax dollars are protected from funding the abortion industry overseas across ALL global health spending, not just family planning dollars. The Bush-era Mexico City Policy protected roughly \$500 million in spending – the new Trump policy protects over \$8.8 billion overseas aid from funding abortion. He also stopped funding the pro-abortion United Nations Population Fund (UNFPA).

6. **The Trump Administration** Department of Health & Human Services (HHS) issued a rule requiring that insurers specify to their customers whether the plan they are buying covers abortion. The administration also requested input on how to better enforce the limited abortion provisions contained in Obamacare.

7. **The President** created a new office in the federal government for Conscience and Religious Freedom, so that people who, for example, are being forced to participate in abortion, can have their rights vindicated more effectively.

8. **President Trump** has ended the Obama assault on the religious freedom of those employers who do not want to cover abortion-inducing drugs in the health insurance plans they offer their employees.

9. **The President** continues to make numerous appointments, across the federal administration, of strong pro-life advocates, starting with Vice-President Mike Pence. Most of the many others he has appointed do not make the headlines, but they are making and implementing policies and practices that advance the pro-life agenda. For instance, in the Department of Health and Human Services, the strategy memo makes it clear that “human beings” include babies in the womb.

10. **The President** has pushed hard for the Senate to pass additional pro-life legislation, like the Pain Capable Unborn Child Protection Act, as well as the full removal of funding from Planned Parenthood. He has promised to sign both bills.

There is much more that can be said, including how the President encourages the movement by speaking in plain terms about the abortion issue, rather than in vague abstractions. Moreover, the President and Vice-President are both the first to attend the March for Life, and have attended and spoken at various other pro-life events and hosted receptions for pro-life leaders.

Please spread the word about these accomplishments, and find even more at our special website, ProLifePresident.com!
